### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Golian, John S. on 10/25/07.

The application has been amended as follows:

1. (Currently Amended) A method for use in a computer system, said computer system having a graphical operating system, for switching between a plurality of open application windows, comprising:

monitoring for switching input indicative of a desire to switch from a current open application window to another of the plurality of open application windows;

upon receipt of the switching input, displaying, over the current open application window, an extracted graphical preview comprising a live running view that reflects real-time changes of actual ~~of the~~ content currently within the another ~~for~~ one of the plurality of open application windows;

monitoring for display input indicative of a desire to make the displayed preview the new current open application window; and

upon receipt of the display input, switching the display from the current open application window to the new current open application window.

7. (Canceled)

9. (Currently Amended) A method for use in a computer system, said computer system having a graphical operating system, for switching between a plurality of open windows that are ranked according to an activation hierarchy comprising:

monitoring for a switching activation signal;

upon receipt of the switching activation signal, displaying, over the open windows, an extracted graphical preview comprising a live running view that reflects real-time changes of actual ~~of the~~ content currently within ~~of~~ the next open window in the activation hierarchy;

monitoring for a display command to activate and display the window corresponding to the displayed preview; and

upon receipt of the display command, activating the open window corresponding to the displayed preview.

21. (Canceled)

22. (Canceled)

23. (Currently Amended) A method for use in a computer system, said computer system having a graphical operating system, for switching between a plurality of open application windows, comprising:

monitoring for switching input indicative of a desire to switch from a current open application window to another of the plurality of open application windows;

upon receipt of the switching input, displaying, over the current open application window, an extracted graphical preview comprising a live running view that reflects real-time changes of actual ~~of the~~ content currently within the another ~~for~~ one of the plurality of open application windows, wherein the extracted graphical preview is displayed adjacent a button in a task bar, the button corresponding with the another one of the plurality of open application windows;

monitoring for display input indicative of a desire to make the displayed preview the new current open application window; and

upon receipt of the display input, switching the display from the current open application window to the new current open application window.

24. (Currently Amended) One or more computer-storage media embodying instructions for performing a[[A]] method for use in a computer system, said computer system having a graphical operating system, for switching between a plurality of open application windows, comprising:

monitoring for switching input indicative of a desire to switch from a current open application window to another of the plurality of open application windows;

upon receipt of the switching input, displaying, over the current open application window, an extracted graphical preview comprising a live running view that reflects real-time changes of actual content currently within the another one of the plurality of open application windows;

monitoring for display input indicative of a desire to make the displayed preview the new current open application window; and

upon receipt of the display input, switching the display from the current open application window to the new current open application window.

***Allowable Subject Matter***

Claims 1-6, 8-20, 23 and 24 allowed.

The following is an examiner's statement of reasons for allowance:

Prior art either alone or in combination doesn't show or teach monitoring for switching input indicative of a desire to switch from a current open application window to another of the plurality of open application windows; upon receipt of the switching input, displaying, over the current open application window, an extracted graphical preview comprising a live running view that reflects real-time changes of actual content currently within the another one of the plurality of open application windows in combination with other features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
